

## **What are “Like-Type” units?**

Each home is grouped with same or similar type homes before the program is initiated.

Among some of the criteria reviewed:

- Number of bedrooms
- Number of baths
- Square footage
- Construction type
- Year built
- Number of levels in the home
- HVAC type (Electric/Gas)

Home type groups are reviewed by the management team, the government partner, AFCEC and a 3<sup>rd</sup> party auditing firm. Once the groups are approved, they are setup for billing.

Changes that occur to the home for renovation purposes, demolition, etc., will be considered to move the home into another group. This can be done easily between the monthly billing cycles.
